SAMPAT

AI based IT Asset management System
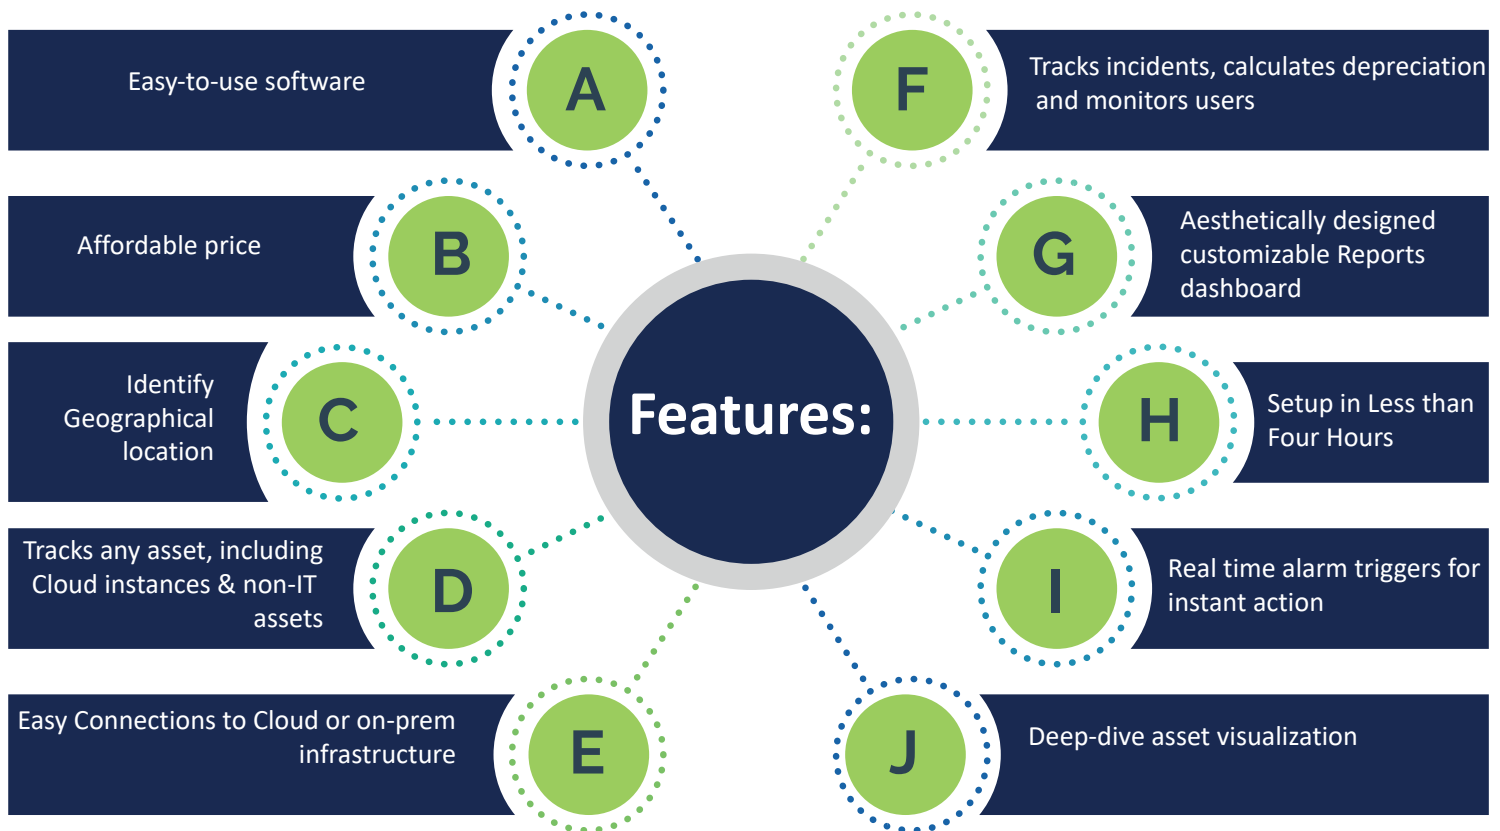

Asset Management,
in total control!

How SAMPAT Helps Track and Optimize Asset Value

Assets are digital, like contracts and software licenses, or physical, like laptops, machineries and more, including tables and chairs, that an organisation need to keep track of. A comprehensive Asset Management tool would help manage all types of assets with ease, boost organisational efficiency, save time and money and generate operational excellence.

About SAMPAT

SAMPAT Asset Management can streamline asset, 'from request-to-discard' process, improve financial reporting and secure business productivity. SAMPAT helps track, manage and optimize IT and non-IT assets across their lifecycle, ensuring compliance, performance and value.

Features:

- **A** — Easy-to-use software
- **B** — Affordable price
- **C** — Identify Geographical location
- **D** — Tracks any asset, including Cloud instances & non-IT assets
- **E** — Easy Connections to Cloud or on-prem infrastructure
- **F** — Tracks incidents, calculates depreciation and monitors users
- **G** — Aesthetically designed customizable Reports dashboard
- **H** — Setup in Less than Four Hours
- **I** — Real time alarm triggers for instant action
- **J** — Deep-dive asset visualization

Enhance your asset management strategy with a solution that provides transparency into asset status, enhances ability to optimize resources and make informed decisions with confidence

Highlights

1. Automated asset tracking:

Gain visibility of assets in tracking status based on IP's – Access point, switches, firewalls, servers, laptops, and desktops

2. Location Tracking:

Be alerted if assets move out of designated locations, enhancing security and control.

3. Hardware Change Notification:

Receive instant alerts for any hardware changes, ensuring prompt attention to modifications.

4. Unauthorized Device Detection:

Get notified of unknown device connections, enhancing security measures.
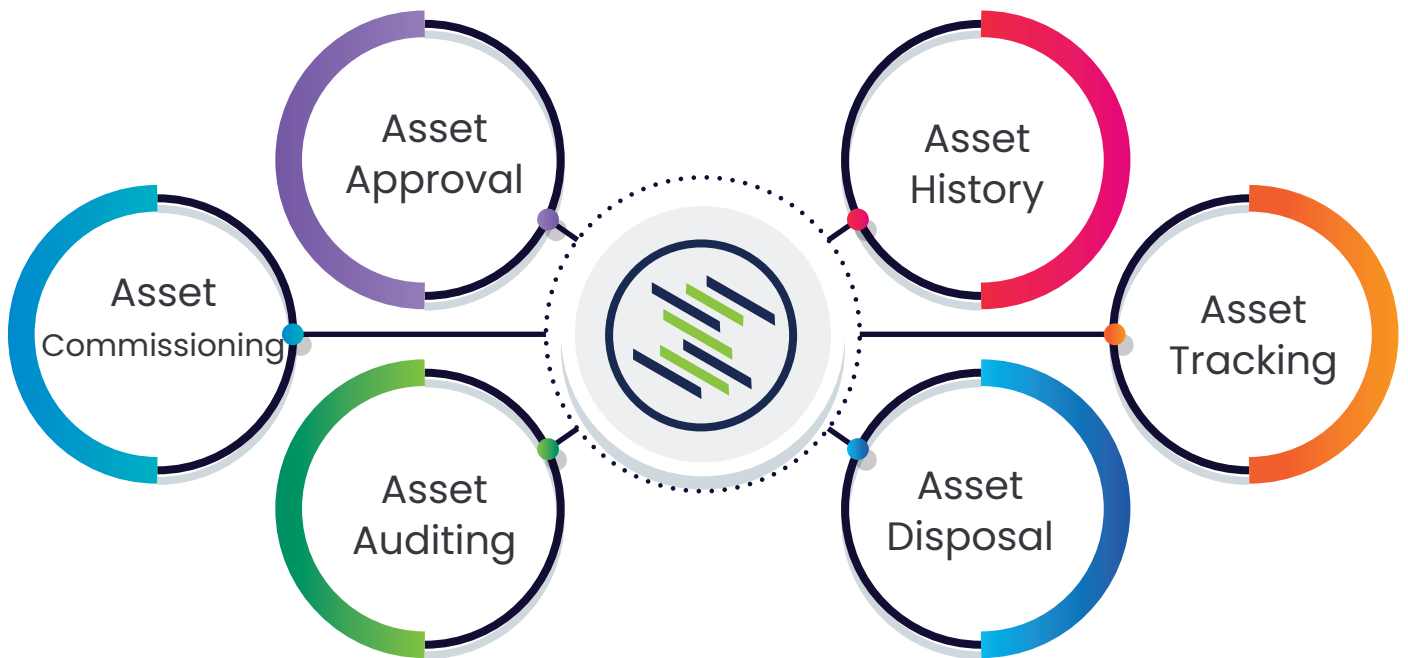

5. Ticket Management :

SAMPAT comes with in-built TMS enabling users to raise tickets, admins to assign and create services history.

6. Real time End-to-end visibility:

1. Get a comprehensive overview of assets with customisable dashboard view, featuring filters by type, age, current value, status, and more.

2. Integrate seamlessly with various applications, including ERPs, for easy access to relevant information.

With SAMPAT, manage

Asset Approval

Asset Commissioning

Asset History

Asset Tracking

Asset Auditing

Asset Disposal

Asset Approval

- Flexible and customized workflows for asset requests and budget checks
