

SECURITY & CYBER ASSURANCE

360*- SECURITY THREAT PROTECTION SERVICES

Cybercrime is the greatest threat to every company in the world.

GINNI ROMMETY

FORMER EXECUTIVE CHAIRMAN, IBM

360*- Security Threat Protection Services

Reputation built over 3 decades of trust, expertise & Customer delight

WHY AMVION

- Certified Security Experts
- Bug Bounty - Program Winners.
- Hall of fame awardees in Facebook, Google.
- 24* 7 Threat Monitoring Services - MSS
 - » Subscription Feed from 4 Top Threat Intel Labs.
- Maintaining 40,000+ Endpoints
- Managed DevSecOps Services
- AI & ML based Deep Threat Analysis
- Cyber Forensics
- Privileged Access Management
- Zero Trust Network Access

360*- Security Threat Protection Services

Brand Monitoring Services

Brand Monitoring Services

External Threat Prevention & Mitigation Services

Surface Area Monitoring

Prevents phishing, spamming and malware attacks

URLs'/I P's Vulnerability Monitoring

Identifies & prevents OWASP - Top 10 vulnerabilities and external attacks

DF24

Looks for any Defacement of critical servers

Fake Mobile App Monitoring

Fake app identification

Negative News Monitoring

Identifies negative news in all internet forums

Brand Monitoring Services

Data Breach Monitoring

Identifies email I d's/ Corporate Information are compromised.

Dark Web Monitoring

Identifies customer data if posted in Dark web.

Internal VA Assessment

Deploy scan for Internal Vulnerability Assessment

Threat Intel API

Prevents/Scans/Deletes malicious content that gets uploaded to the client's business application/website

360*- Security Threat Protection Services

Managed Security Services

Managed Security Services (MSS)

SIEM - Security Information Event Management

Identify, Monitor real-time threat with Security Orchestration, Automation and Response Technology with UEBA along with File Integrity Monitoring.

Vulnerability Assessment and Penetration Testing

Identify and mitigate internal and external vulnerabilities.

Secure Code Review

Identifies the Security Flaws in the code or Vulnerability

WAF - Web Application Firewall

Protects critical applications. Major Vulnerabilities like DDOS and SQL Injection are prevented.

PAM – Privileged Access Management

Automatically discover and onboard privileged credentials and secrets used by human and non-human identities. Enable secure access for remote employees and external vendors to Privileged Access Manager,

360*- Security Threat Protection Services

Endpoint Management

Endpoint Protection & Management

AV- Antivirus

Protects from malware, spyware integrated with DLP & Asset management

DLP – Data Loss Prevention

Protects from data loss of sensitive content DLP will monitor all major exit points

EDR/XDR - Endpoint Detection & Response

Solutions that records & analyses endpoint-system-level behaviors, provide contextual information, block malicious activity and provide remediation suggestions to restore affected systems

End-user Monitoring

Monitoring the remote user's behavior or actions, analyze the data and work on improving user experience

ZTNA – Zero Trust Network Access

Zero trust network access (ZTNA), also known as the software-defined perimeter (SDP), is a set of technologies and functionalities that enable secure access to internal applications for remote users. It operates on an adaptive trust model, where trust is never implicit, and access is granted on a need-to-know, least-privileged basis defined by granular policies.

360*- Security Threat Protection Services

Cloud Security

Cloud Security Services

Posture Assessment

Analyze and re-mediate any misconfiguration on the cloud workloads.

Compliant Assistance

Assesses for policy violations with in-built security rules based on CIS AWS foundation benchmark, ATT&CK, ISO 27001, NIST 800-53, NIST CSF, CSA-CCM, AWAFF etc.

Infrastructure as Code (I.A.C)

Shift- Left approach to scan IAC templates for misconfiguration and vulnerabilities both in runtime and build.

OWASP - 10 Check

Analyze on High Level Vulnerabilities in the application hosted.

Threat Monitoring- Correlation & Reporting

Monitors for unusual identity behaviour. Detects by human and machine identities and provides recommendations.
